About project

Objectives of the project:

- Introduce Erasmus + opportunities to young people.
 - Be aware of the possibilities of YouthPass, learn to better understand and analyze the eight key competences for lifelong learning.
 - Show young people cultural, religious, linguistic and social diversity through non-formal learning methods.
 - To learn to consciously apply natural imagination (creative visualization) in order to achieve better results in education and business in the future.
 - Strengthen cohesion between generations, increase social cohesion through the collection, analysis and visualization of proverbs.
 - Through the method of creative visualization, learn to create connections and supplement knowledge of one's own culture and folklore, feel one's linguistic mentality and the harmonious diversity of other cultures.
 - Gain experience from conducting an ethnographic project - from data collection, surveys and rewriting to material analysis and archiving.
 - Expanding and strengthening the cooperation network at local, national and international level.
 - Change the perception of folk wisdom as something outdated and boring, increase the use of proverbs.
 - Create at least 8 new visual arts that output the content of proverbs using different visualization techniques
 - Create a short video that introduces our project and project results.
