Short intro

We are a small organization that leads young people to the active citizenship, personal development and inclusive society. We would like to actively participate in the transformation of young people towards active citizens. Our vision is to have an inclusive and tolerant society whose members take care of their surroundings and they have the need to educate themselves and to grow personally through lifelong learning processes. We came with the idea of the project E+ Inclusion. Within this applied project we are addressing the issue of the NEETs group.

The project consists of two mobilities. The first activity is the training course for the youth workers. The second activity is opened for youngsters with fewer opportunities, NEETs group in the age 14-17 years old. This E+ Inclusion initiative is aiming to help reintegrate young people back to schools or into labour market. This project will create the environment for investigation the current situation of young people in the involved countries, focusing specifically on NEETs for including them into the Erasmus+ projects.

Youth unemployment is one of the major challenges of EU employment policy as 12.9% of those aged 15 – 24 in the European Union are currently not in employment. Young people not in employment, education or training are at higher risk of being socially and politically alienated. They have a lower level of level of interest and engagement in politics and lower level of trust.
