## CMS Net the NEETs

- **Please describe the impact of this project on your personal and professional development:** get to know more about the Erasmus+ opportunities and good practices from other NGOs, share good practices that I've learned, motivation to continue working in the future, new ideas and inspiration, listen more and be careful about people's needs and feelings
- **Pick your favorite workshop and explain why it was your favorite:** KA1 and KA2 explanation, promotion of the Erasmus+, Elevator Pitch: people were able to share the ideas of their projects and find new partners, project making workshop and presentation of our projects, creation of a prototype of our NGO's target group
- **How do you evaluate the internal lecturers (Marty, Iva, Anna)?** Impressive facilitators. They obviously are experienced and don't have much room for improvement. They were productive, patient, helpful and creative as well. They were very calm, involved, focus on what they had to do but also open to suggestions. They are flexible and have good communication skills. Some activities could have been more addressed at the young people present. The only thing that I would improve is the time limit.
- **How was your satisfaction with logistics and organization of the project (transport to the venue, communication before the project, amount of application forms, information provided,...):** the venue was harder to reach which made the way tiring but we had all the necessary support, all logistics are built taking into account the wishes of all participants, I had good communication during the preparation phase as well as during the activities in terms of logistics, administration, transportation and other information, I am very satisfied

## CMS Net the NEETs

- If this project had a follow up, what should be definitely included in the Net the NEETs 2.0. (in terms of activities, methods, etc.): More project writing sessions, more about promotion and ways to get in touch with target group, results of the future project, more examples from practice, learn how to conduct interviews with adolescents with special needs, maybe develop a special questionnaire at the seminar, institutional visits, more detailed strategies
- If you could implement a project on any topic which topic would it be? What would be the aims?: Funding, inclusion, social entrepreneurship, mental health, wellbeing, mindfulness, marketing for NGOs/youth workers
